- **Operating Systems:** macOS, Linux (RedHat and Debian based), Windows

Experience

Workplace

Lead Engineer - [Activations](#)

- Thought leader and mentor on unit and load testing strategies across teams
- Planned, designed, and was primary developer for Federal EIN Verifications feature
- Designed and built our [embeddable components](#), sealing the deal on new partners
- Collaborated with legal and compliance to build our solution for paystub printing

Workplace

Senior Backend Engineer - [Progressive Delivery](#)

- Maintained GitLab's Ruby on Rails DevOps infrastructure backend and Vue.js frontend
- Expanded feature flags rollout strategies to support flexible percent rollouts using [Unleash](#)

Workplace

Lead Software Engineer - [Studio Platform](#)

- Built and maintained InVision Studio, a React and Electron app used by five million designers
- Led our six-person Platform squad in initial design to delivery of third-party plugins built with a TypeScript and NodeJS backend

Workplace

Senior Engineer - MyFitnessPal & MapMyRun

- Lead developer of Scala-based microservice for a \$1 M Samsung partnership
- Used ML in Python to build [a patented classifier](#) for identifying fitness classes
- Refactored existing ruby microservices to use a new real-time stream based notification system, driving 20 k push notifications and emails per minute
- Planned and implemented the migration of the MyFitnessPal steps tracking feature used by 225 M users from a Rails monolith to a Go microservice, reducing response times by 300%

Workplace

Software Engineer II - Data and Products

- Instrumented iOS applications with event tracking using Objective-C++ and Swift
- Prototyped a “Buy Now” button with a Python backend leveraging [Stripe.js](#)
- Implemented a realtime high availability data pipeline using Kinesis and Storm
- Optimized Python data-engineering tools using SQL for reporting on A/B-test experiments

Workplace

Senior Software Developer - Data Sciences

- Leveraged sophisticated data mining techniques to solve big data analytics problems
- Collaborated with research and sales teams to produce client-driven SaaS products

Workplace

Engineering Scientist Associate

- Designed high frequency active sonar installed on 75% of US nuclear attack submarines
- Implemented a target tracking and feature classification system for mine avoidance

Workplace

Software Engineer

- Programmed interfaces to data acquisition modules for lab machines
- Designed a mobile desorption oven as well as porosity and core gamma systems

Open Source

- [SpellBot](#): A Discord bot for [SpellTable](#): Remote magic made easy
- [nanodbc](#): A small C++ wrapper for ODBC, used by the [R programming language](#)
- [pancake-master](#): A dynamic webpage for [Master Pancake](#) showtimes
- [atom-notes](#): Embedded [notational velocity](#) for the Atom code editor
- [multi-wrap-guide](#): Multi-wrap guides for the Atom, [featured in an Atom blog post](#)
- [generator-studio-app](#): Scaffold generator for [InVision Studio](#) plugins
- [C++ dict](#): Proof-of-concept C++ dict class with Python-like features
- [dotfiles](#): My personalized machine configuration management system

Education

School

Bachelor of Science in Computer Science

- Minors in Linguistics and Mathematics
- Implemented a buddy-system memory manager and a multi-level feedback process scheduler
