

Lexical Unit

Portland, OR

resume@lexicalunit.com

Skills

- **Languages:** Python, TypeScript/JavaScript, C++, SQL, Shell, Go, Rust, Ruby, Scala, Swift
- **Frameworks:** Django, Node.js, Flask, FastAPI, React, Rails, Boost, SQLAlchemy, Akka
- **AI/ML:** LLMs, Scikit-learn, PyTorch, LangChain, MCP, Classification, Machine Learning
- **Infrastructure:** Lambda, ECS/Fargate, Docker, Kafka, API Gateway, Terraform, Kubernetes
- **Tooling:** pytest, Webpack, Git, GitHub, GitLab, GraphQL, Linear, JIRA, CMake, ODBC, $\text{\LaTeX}$
- **Cloud & Platforms:** AWS, Databricks, CircleCI, Grafana, Sentry, PagerDuty, LaunchDarkly
- **Databases:** PostgreSQL, Snowflake, Redis, MongoDB, Vertica/Greenplum, Elasticsearch
- **Practices:** Agile, Scrum, Distributed System Design, Test/Behavior Driven Development

Experience

Builder.io

Senior Software Engineer - Fusion Team

Remote

05/2026 – Present

- Designed and built out AWS VPC support for Builder.io, itself hosted on GCP
- Collaborated with a cross-functional team and AI services to deliver features

SpellBot & Convoke

Creator & Co-creator

Remote

08/2019 – Present

- Created SpellBot, a Discord matchmaking bot serving the [SpellTable](#) community
- Grew [SpellBot](#) to 18k+ monthly games with a self-sustaining financial model
- Co-developing [Convoke](#), a next-generation webcam Magic: The Gathering platform
- Scaled Convoke to 20k+ active users within the first 4 months of launch

MonteCarlo

Full Stack Developer - Data Engineering Team

Remote

01/2023 – 03/2026

- Designed our horizontally scaling event processing pipeline handling millions of events a day
- Optimized distributed rule evaluation, alert notification, and data export at scale
- Led development of internal monitoring & QA systems, reducing incident detection time by days
- Built [agentic interfaces](#) to our GraphQL API using LangChain, boosting user engagement

Check

Lead Engineer - Activations Team

Remote

02/2021 – 12/2022

- Mentored multiple teams on testing strategies, improving test coverage by 60%
- Designed [embedded payroll](#) components that directly secured multiple enterprise partnerships

GitLab Remote
Senior Backend Engineer - Progressive Delivery 01/2020 – 02/2021

- Maintained backend APIs to GitLab's DevOps platform serving over 50 million users
- Shipped flexible percent-based [feature flag rollouts](#) using [Unleash](#)

InVision Remote
Lead Software Engineer - Studio Platform 01/2018 – 01/2020

- Developed core features for InVision Studio, a design tool used by 5 million designers
- Led 6-person squad to deliver third-party plugin system, enabling community plugins

UnderArmour Connected Fitness Austin, TX
Senior Engineer - MyFitnessPal & MapMyRun 10/2015 – 01/2018

- Led development of Scala-based microservice for a \$1M Samsung partnership
- Architected an iOS and Python *Find Fitness Classes* feature in partnership with Mindbody
- Engineered [a patented ML classifier](#) for fitness class identification
- Planned and implemented the migration of the MyFitnessPal steps tracking feature used by 225 million users from a Rails monolith to a Go microservice, reducing response times by 300%

RetailMeNot, Inc. Austin, TX
Software Engineer II - Data and Products 04/2014 – 09/2015

- Instrumented iOS applications with event tracking using Objective-C++ and Swift
- Optimized Python data engineering tools using SQL for reporting on A/B-test experiments

Adometry, Inc. (Adometry by Google) Austin, TX
Senior Software Developer - Data Sciences 03/2012 – 02/2014

- Designed the [nanodbc](#) library, now used by the [R programming language](#)
- Architected Web API resources using Flask, gunicorn, and Nginx

Applied Research Laboratories: UT Austin, TX
Engineering Scientist Associate - Advanced Technology Laboratories 08/2006 – 02/2012

- Designed high frequency active sonar installed on 75% of US nuclear attack submarines
- Implemented a target tracking and feature classification system for mine avoidance
- Held Secret security clearance

Open Source

- [nanodbc](#): A small C++ wrapper for ODBC, used by the [R programming language](#)
- [pancake-master](#): A dynamic webpage for [Master Pancake](#) showtimes
- [dotfiles](#): My personalized machine configuration management system

Education

School College Station, TX
Bachelor of Science in Computer Science 08/2001 – 05/2006
